

PRESS RELEASE

17 FEBRUARY 2010

Diamond Aircraft takes part in the fifth International Business Aviation Exhibition Jet Expo 2010 to be held on September 15 – 17, 2010 in Moscow Crocus Expo exhibition center.

Established in 1991, Diamond Aircraft Ind. (DAI) has since then developed more than 10 different aircraft types in all 3 production locations – in Austria, Canada and China.

Austro Engine GmbH has implemented the first diesel powered aviation engine into a general aviation airframe.

Diamond Simulation offers complete simulator training for single, multi engine & jet aircraft.

Diamond Airborne Sensing is offering a Multi Purpose Platform with high-tech sensors and cameras.
