

OPERATIONAL FLIGHT PLAN (OFP)

Powerful and highly customized Flight Planning System software for nearly any aircraft/helicopter. Including, up to Worldwide Navigation Data-Base, Mass & Balance, ATC and Operational Flight Plan. Includes probably the most accurate and appreciated fuel calculation system on the market. We make more with your Flight Planning system.

GROUND OPERATING SYSTEM (GOS)

Innovative Quotation software. An accurate and consistent tool of quoting Corporate/Charter flights. Instant quotes and "Flight Profit" survey based on aircraft type, aircraft range & runway performances, flown time, distance and customized billing items such as: ferry flights, dead-day, night-stops, landing/parking fees, catering etc. You have more with our Flight Quotation system.

SUMMARY OF CHECKS AND COURSES (SOCC)

Crew Training survey Management system. Not much else to do than enter last training dates from Flight Crew Licences, Aircraft Ratings, Ground Courses, Airport Categories and Initial Courses or last Passport / Vaccination validations. More than hundreds expiration dates may be surveyed for each Crew Member. Handy print-out is available as remember card for Crew and well appreciated by authority inspectors.

TAKE-OFF AND LANDING DATA (TOLD)

Developed by Abacus Aviation, this outstanding Take-Off and Landing Data (TOLD) is perfectly tailored to each aircraft and represents the essential parts of the Aircraft Flight Manual (AFM) or Performance Handbook with all necessary charts, graphs and data to compute and display Take-Off, Climb or Landing Performance.

- Available with optional Mass & Balance calculation system

Mass & Balance System (M&B)

Our Mass & Balance is well adapted for nearly any Aircraft. Instantly M&B calculation with outstanding and more than comprehensive Mass & Balance report. You have to enter only the different loads and the program update the result. The three graphic envelopes show graphically the result. Automatic system warnings are produced if M&B exceeded any limitations. Self explaining system, no manual needed!

LAST MINUTE CHANGE (LMC)

"Last Minute Change" calculations on pocket PC's for most types of aircraft. This stand-alone system is similar to our proven Mass & Balance software with fully customized aircraft data including more useful and appreciated pre-flight calculations

SPECIAL APPLICATIONS ON REQUEST

Have you any ideas for special applications? The Abacus Aviation Team will gladly answer to your questions and are ready to help you build or organise your enterprise.
